

# 100m Running Deer Doubles

In addition to Rules Applicable to all Moving Target Competitions, the following rules apply:

**Rifles & Ammunition:** Any rifle is permitted which meets the BSRC Class A centrefire standard. There are no restrictions relating to ammunition other than the current range regulations.

**Range Standards:** The range must conform to the NSR specifications.

**Targets:** One target, which has two scoring diagrams, will be used for each pair of shots left and right running. Targets must be of a design approved by the NSR.

Scoring will usually employ the electronic scoring system. Should this be unavailable, shots will be covered with a patch of suitable colour after each shot or pair of shots prior to the next run. At formal Club Matches, the value of the shots will be communicated to the firing point for recording before they are patched. If gauging should be necessary, an 8.00 mm diameter plug gauge will be used.

**Course of Fire:** Two series of 20 shots: 10 shots in each direction (5 runs of the target in each direction, two shots per run of the target). 4 non-convertible sighting runs of the target are permitted prior to each series. The shooter can choose to take either one or both shots during each sighting run.

Once the target is visible, the rifle may be raised to the shoulder during the 1 – 2 seconds 'antler run' prior to the 23 m run when the whole target is exposed.

When shot during the BSRC Historic Match using double rifles, the course of fire is restricted to two sighting runs and five scoring runs (three right to left and two left to right).
