

100m Running Deer Singles

In addition to Rules Applicable to all Moving Target Competitions, the following rules apply:

Rifles & Ammunition: Any rifle is permitted which meets the BSRC Class A centrefire standard. There are no restrictions relating to ammunition other than the current range regulations.

Range Standards: The range must conform to the NSR specifications.

Targets: One target, which has two scoring diagrams, will be used for each pair of shots left and right running. Targets must be of a design approved by the NSR.

Scoring will usually employ the electronic scoring system. Should this be unavailable, shots will be covered with a patch of suitable colour after each shot or pair of shots prior to the next run. At formal Club Matches, the value of the shots will be communicated to the firing point for recording before they are patched. If gauging should be necessary, an 8.00 mm diameter plug gauge will be used.

Course of Fire: Two series of 20 shots: 10 shots in each direction. 4 non-convertible sighters (2 in each direction) may be taken before the start of each 20 shot series.

Once the target is visible, the rifle may be raised to the shoulder during the 1 – 2 seconds 'antler run' prior to the 23 m run when the whole target is exposed.
