

50m Running Boar Class B Event

In addition to Rules Applicable to all Moving Target Competitions, the following rules apply:

Rifles & Ammunition: Any rifle is permitted which meets the BSRC Rimfire .22LR. There are no restrictions relating to ammunition other than the range limits.

Range Standards: The range must conform to the ISSF specifications

Targets: Targets must be of a design approved by the ISSF.

Scoring will usually employ the electronic scoring system. Should this be unavailable, one pair of targets will be used for each series, either full targets, half targets or full targets with 'repair centres'. The same pair of targets will be used for the sighting runs.

The sighting shots will be covered with black patches before the scoring shots are fired. If they are not fired the equivalent number of black patches must be stuck on the target outside of the scoring area.

Scoring shots must be covered with transparent adhesive patches before the target runs again. In the event that a shot is not fired or fails to hit the target, the equivalent transparent patch will be stuck on the target outside of the scoring rings. At formal Club Matches, the value of the shots will be communicated to the firing point for recording before they are patched.

If gauging should be necessary, the shot hole gauges specified in the ISSF General Technical Rules for the 50 m Running Boar event will be used.

Course of Fire: One series of 10 shots: 5 slow runs in each direction 2 slow sighters

NB: For Mixed Runs, the target will run at random so that the shooter cannot anticipate whether it will be a 'slow' or a 'fast' run. There must not be more than five consecutive runs of the target at the same speed.

Stalkiers Match The course of fire is one series of 20 shots comprising 5 slow runs and 5 fast runs in each direction in random order. No dry firing, no sighting shots, no shooting aids; .22 rimfire rifles only. This competition will be restricted to .22 rimfire rifles fitted with single cross hair type 'hunting' reticule scopes only*. The CRO's decision on the day regarding the eligibility (or not) of an individual scope or reticule type used will be final.
