

50m Running Boar Mixed Runs

In addition to Rules Applicable to all Moving Target Competitions, the following rules apply:

Rifles & Ammunition: Any rifle is permitted which meets the BSRC Rimfire .22LR standard. There are no restrictions relating to ammunition other than the range limits.

Note: when this event is shot during the Stalkers' Match rifles will be restricted to those fitted with single cross hair type 'hunting' reticule scopes only. No twin post or similar dedicated Running Target reticule type scopes are to be used. If it was designed specifically for use on Running Targets, then it is not eligible for this event. Mil dot & other widely available reticule types i.e. those not specifically made for RT events, continue to be eligible.

The CRO's decision on the day regarding the eligibility of an individual scope or reticule type will be final.

Range Standards: The range must conform to the ISSF specifications

Targets: Targets must be of a design approved by the ISSF.

Scoring will usually employ the electronic scoring system. Should this be unavailable, one pair of targets will be used for each series, either full targets, half targets or full targets with 'repair centres'. The same pair of targets will be used for the sighting runs.

The sighting shots will be covered with black patches before the scoring shots are fired. If they are not fired the equivalent number of black patches must be stuck on the target outside of the scoring area.

Scoring shots must be covered with transparent adhesive patches before the target runs again. In the event that a shot is not fired or fails to hit the target, the equivalent transparent patch will be stuck on the target outside of the scoring rings. At formal Club Matches, the value of the shots will be communicated to the firing point for recording before they are patched.

If gauging should be necessary, the shot hole gauges specified in the ISSF General Technical Rules for the 50m Running Boar event will be used.

Course of Fire: Two series of 20 shots: 5 slow runs and 5 fast runs in each direction in random order –)
2 slow + 2 fast sighters

The Running Boar Mixed Runs – Memorial Match & Stalkers Match

This competition effectively is shot on either of the 50m Running Boar Range with rifles which meet the BSRC Rimfire .22LR standard. There are no restrictions relating to ammunition other than the range limits. The course of fire is identical to the Running Boar Mixed Runs competition, except that no sighting shots or any 'dry firing' are allowed. Shooting is otherwise in accordance with the ISSF Rules.

If two or more shooters tie for first place, the shooter whose worst shot(s) has the highest value will be deemed to have won. The decimal scoring available with the electronic target system (out to the '1' ring) will be used to establish the worst shot.
